Dell Wyse ThinOS thin clients

Secure by design: Virus and malware immune firmware base with an un-published API and zero attack surface*
Introducing Dell Wyse ThinOS thin clients

Secure simplicity on your desktop
A key component of Dell desktop virtualization product offerings and one of the most secure operating systems in the world for cloud and virtual computing environments, ThinOS is certified with Citrix, Microsoft®, VMware, Dell Workspace, and other ecosystem partners. Unlike Windows® and Linux, ThinOS was created just for virtual desktops with patented technology from Dell Wyse, the thin client leader with over 220 patents in this area. ThinOS is:

- **Secure by design:** Virus and malware immune* with an un-published API and zero attack surface
- **Secure by function:** Supports a robust 802.1x wired and wireless authentication spectrum of security protocols: from all EAP connection types to robust LAN based authentication including EAP-TLS
- **Fast:** Boots in under 10 seconds to secure desktops based on a variety of authentication methods, including single sign-on and 2-factor authentication.
- **Easy to manage:** Covers the everyday basics so you don’t have to. IT can get out of the desktop hardware maintenance business
- **One of the best HDX and RDP experiences in a non-Windows client:** RDP 8.0 support and a custom Citrix 3.x receiver from Dell Wyse developed in collaboration with Citrix enable a rich user experience based on the latest HDX feature set, and outstanding ICA and RDP performance.

The C10LE is a highly capable and affordable thin client for task workers who consume and edit content and who need word processing and internet access. The VIA Eden 1GHz processor offers excellent performance at a cost-effective price.

The C10LE’s small size enables discrete mounting options: under desks, to walls, and behind monitors. Operating with fewer than 7 watts of electricity, the C10LE’s energy efficient performance and cool, quiet operation can reduce costs and environmental impacts.
Dell Wyse T10 thin client Features

For task workers who need video

The T10 handles everyday tasks with ease and also provides multimedia acceleration for task workers who need video. Users will enjoy integrated graphics processing and additional WMV & H264 video decoding capabilities from the Marvell ARMADA™ PXA 510 v7 1.0 GHz System-on-Chip (SoC). In addition, the T10 is one of the only affordable thin clients to support dual monitors with monitor rotation, enabling increased productivity by providing an extensive view of task work.

Designing smooth playback of high bit-rate HD video and graphics in such a small box hasn’t been at the expense of energy consumption and heat emissions either. Using just 7 watts of electricity earns this device an Energy Star V5.0 rating. In addition, the T10’s small size enables discrete mounting options: under desks, to walls, and behind monitors, creating cool workspaces in every respect.
Ultra-high performance in a compact package

Power users and knowledge workers will love the exceptionally fast speed and power from the new dual-core driven D10D. With a 1.4 GHz AMD G series APU with integrated graphics engine, the D10D handles everything from demanding multimedia applications to business content creation and consumption with ease.

The D10D even supports power users’ most demanding workloads: high quality audio and video, unified communications, CAD/CAM, 3D simulation and modeling, HD Flash and multimedia, and dual digital high resolution displays with rotation.

Users will enjoy smooth roaming and super fast 802.11 a/b/g/n wireless at 2.4 and 5 GHz with dual antennas. The D10D is Citrix HDX, Microsoft® RemoteFX, and VMware® Horizon View certified. It also supports legacy peripherals via an optional USB adapter.

Averaging 9 watts, each and every D10D contributes — quietly and coolly — to lowering your organization’s carbon footprint, with reduced power usage and emissions.

Dell Wyse ThinOS is virus and malware immune

It is technically impossible for a virus to attach to Dell Wyse ThinOS or the Dell Wyse thin client on which it resides. It consists of a networking and protocol stack and is not a general-purpose operating system. Therefore, it has zero exposed API’s and no local file system or other potentially vulnerable exposures to exploit.

Product weights

Product weights stated may vary depending on configuration and manufacturing variability.
